ELIZA NEALS is an outstanding emerging female artist on the independent East Coast music scene. Moving recently from her home town of Detroit to New York City, Eliza has lifted audiences and sold out some of the best rooms including Joe's Pub, The Bitter End, Knitting Factory and Cutting Room. Her latest album, "No Frogs for Snakes," exposes Eliza's talents for singing deeply romantic almost obsessive ballads with rompy rocky anthems and blues riffed out tracks. Eliza's Detroit Rock City roots blend beautifully with her classical opera training. Co-writing with the original Motown legend **Barrett Strong**, Eliza has produced a sound that's unparalleled in Rock n Soul today.

Eliza Neals continues to open up for the iconic Motown group **The Four Tops!**
